

At Complas Australia we pride ourselves on our ability to provide “quality plastics and independent advice” with the view to helping our customers solve their plastic materials problems.

With many years experience in the procurement, selection, and machining of engineering grade thermoplastics, we offer a friendly and knowledgeable response to your questions.

We offer pressed and extruded semi finished plastics in Sheet, Rod, Tube and Tape form, in a variety of grades, colours and dimensions.

Our specialty lies with the ability to tackle the difficult or unusual applications with modified materials that enable individual solutions.
